What is it?

Track N' Drive is a multipurpose organizational tool specifically designed for the end user to maximize cost efficiency and scheduling repairs for their automobile.

Our application offers a variety of uses, all free of charge.

App Demo!!!

Target Users

- Car owners that maintain their own cars
 - Small dealerships that could use an app to keep track of their inventory
 - Companies that own cars for employee use
- 

Highlight of Our App

- Simple, easy to use UI
 - Keep track of previous repairs
 - Easily add repairs that need to be done
 - Cost over time analysis
- 

Easy & Hard Tasks

- Easy Tasks
 - Making a simple to use UI
 - Authentication & Authorization
 - Git Version Control
 - Hard Tasks
 - Making the model
 - URL Mapping Parameter capture
 - Forms
- 

Future Work

- Rendering a chart that asynchronously update data plot info based on repair costs per car
 - Setting up text and email notifications based on future repairs
 - Show car shops near your location
 - Fix Google Map embedding for car shop location
- 

Q&A
